Figure 1: Schematic representation of the study design. The diagram illustrates the timeline and participant flow of the study. It shows the recruitment of 1000 subjects in 2006, the distribution of 1000 questionnaires in 2007, and the follow-up of 1000 subjects in 2008 and 2009. The study is divided into two main phases: 'Baseline' (2006-2007) and 'Follow-up' (2008-2010). The 'Baseline' phase includes the recruitment of 1000 subjects and the distribution of 1000 questionnaires. The 'Follow-up' phase includes the follow-up of 1000 subjects and the distribution of 1000 questionnaires. The diagram also shows the distribution of 1000 questionnaires to 1000 subjects in 2008 and 2009. The final outcome is the distribution of 1000 questionnaires to 1000 subjects in 2010.
